

BAHATI L. EUSEBIUS

CONTACTS

Phone: 0769101739

bahatieusebius@gmail.com

Location: Nairobi Kenya

TECHNICAL SKILLS

- System Thinking
- Full-stack Web developing
- Ethical Haking
- Junior Cybersecurity Analisist
- Mobile Designing & Developing
- AI & ML System Engineering
- UI/UX Designing
- AI Driven Automation Designing & Developing
- AI cybersecurity Engineering
- Software Designing & Developing

OTHER CERTIFICATIONS

- Ethical hacker-Intermidiate (CISCO)
- Cybersecurity (CISCO)
- Network Defence (CISCO)

LANGUAGES

English

Kiswahili

PROFILE

Innovative and results-driven AI and Cybersecurity enthusiast with a strong focus on building practical, intelligent security solutions. Skilled in integrating artificial intelligence with network security and automation to detect and respond to cyber threats effectively.

Experienced in developing concepts such as intrusion detection systems, zero-trust architectures, and automated security frameworks. Demonstrates the ability to design scalable and efficient solutions tailored for real-world environments.

Passionate about emerging technologies including autonomous security systems, predictive threat intelligence, and adaptive cyber defense. Committed to continuous learning and creating secure, reliable, and high-performance systems.

WORK EXPERIENCE

Independent Projects

AI & Cybersecurity Systems Developer **(J.A.R.V.I.S)** Dec.2024 - Present

- Designed and developed AI-driven cybersecurity systems integrating **network security, automation, and intelligent threat detection**
- Built concepts for an advanced firewall with intrusion detection, anomaly detection, and automated response

Independent Projects

Smart Meter Application Developer **(Velo – Mobile App)**Mar.2026 - Present

- Designed and developed a **smart electricity monitoring system** inspired by solutions used by Kenya Power
- Built an interactive web application to display **real-time energy consumption, token balance, and usage analytics**
- Structured backend databases for **meter data, user management, and billing systems**
- Focused on creating a **scalable, user-friendly interface** for both customers and administrative control

Independent Projects

(Falcon Eye) is a next-generation, AI-powered national traffic intelligence system designed to enhance road safety, reduce congestion, improve emergency response efficiency, and support data-driven transport management in Kenya.Falcon Eye is designed to complement and enhance NTSA's regulatory mandate by providing real-tim road intelligence and predictive analytics for safer, more efficient national mobility.

EDUCATION

The cooperative University Of Kenya | Nairobi Kenya

Computer Science , Bachelor of Science — Sep.2023 - Present

St Marys Kibabii National School | Bungoma Kenya

KCSE , High School Diploma — Jan.2019 - Dec.2022

Misikhu RC Boy | Bungoma Kenya

KCPE , Primary School Certificate — Jan.2010 - Dec.2018
